

Established in 1994, Snapware specialises in storage and organisation for the home and kitchen. The driving force behind every product Snapware develops is innovation and the desire to help you organise your life.

Airtight

Snapware's Airtight range provides storage solutions for wet and dry food that is 100% leak proof and airtight. This means your lunches, snacks and stored food will stay fresher for longer, as well as ensuring safe transportation of food as liquids are prevented from leaking out. The Airtight range embraces modular design, ensuring easy nesting and organised storage when in use.

Snap 'N Stack®

Whether for the kitchen, bedroom or home office, Snapware Snap 'N Stack® makes organising and transporting your craft and food items a breeze. The patented stackable system allows the convenience of adding as many layers as necessary, while the removable tray divider keeps your items organised and always at your fingertips. The food storage range features perfectly sized removable trays, which keeps cup-cakes and sweet treats safe and secure during transportation.

Snapware's other lines include Smart Store® and Airtight Canisters. From food and home storage containers to the closet and beyond, Snapware has a container that will help you store, serve or transport all your perishable and household items.

Limited Warranty.
